

Malware Analysis Report For elf-Haiku-GCC2-Is

Binary Type

ELF (Executable and Linkable Format). (Approved)

Analyzing File

- **File Name:** elf-Haiku-GCC2-Is
 - **File Extension:**
 - **File Type:** ELF (Executable and Linkable Format)
 - **MD5 Hash:** 0bfcd2d056fc187f99f3524ee6d26e31
 - **SHA256 Hash:** 1b68a8230c95aa77fd4a0e7545fb58ddc7fe05a07954be63913219bdec0c181e
-

File Identification

File detected as a valid Linux executable.

ELF File Analysis

ELF File Analysis: True

- terminate_after
- With no FILE, or when FILE is -, read standard input.
- Mandatory arguments to long options are mandatory for short options too.
- The SIZE argument is an integer and optional unit (example: 10K is 10*1024).
- Units are K,M,G,T,P,E,Z,Y (powers of 1024) or KB,MB,... (powers of 1000).
- Display values are in units of the first available SIZE from --block-size,
- and the %sBLOCKSIZE, BLOCK_SIZE and BLOCKSIZE environment variables.
- Otherwise, units default to 1024 bytes (or 512 if POSIXLY_CORRECT is set).

- TIME_STYLE
- invalid time style format %s
- time style
- Valid arguments are:
- - [posix-]%s
- - +FORMAT (e.g., +%H:%M) for a 'date'-style format
- %Y-%m-%d %H:%M:%S.%N %z
- %Y-%m-%d %H:%M
- %Y-%m-%d
- %m-%d %H:%M
- error initializing month strings
- LSCOLORS
- COLORTERM
- unrecognized prefix: %s
- unparsable value for LSCOLORS environment variable
- target
- QUOTINGSTYLE
- ignoring invalid value of environment variable QUOTINGSTYLE: %s
- cannot open directory %s
- cannot determine device and inode of %s
- %s: not listing already-listed directory
- reading directory %s
- closing directory %s
- gobblefile
- !commandlinearg || inode == NOTANINODENUMBER
- cannot access %s
- unlabeled
- cannot read symbolic link %s
- cannot compare file names %s and %s
- sortfiles
- sorttype != sortversion
- formatinode
- INTBUFSIZEBOUND (uintmaxt) <= buflen
- %s %*s
- Usage: %s [OPTION]... [FILE]...
- List information about the FILES (the current directory by default).
- Sort entries alphabetically if none of -cftuvSUX nor --sort is specified.
- -a, --all do not ignore entries starting with .
- -A, --almost-all do not list implied . and ..
- --author with -l, print the author of each file
- -b, --escape print C-style escapes for nongraphic characters

- `--block-size=SIZE` scale sizes by `SIZE` before printing them; e.g.,
- `'--block-size=M'` prints sizes in units of
- 1,048,576 bytes; see `SIZE` format below
- `-B`, `--ignore-backups` do not list implied entries ending with `~`
- `-c` with `-lt`: sort by, and show, `ctime` (time of last
- modification of file status information);
- with `-l`: show `ctime` and sort by name;
- otherwise: sort by `ctime`, newest first
- `-C` list entries by columns
- `--color[=WHEN]` colorize the output; `WHEN` can be 'always' (default
- if omitted), 'auto', or 'never'; more info below
- `-d`, `--directory` list directories themselves, not their contents
- `-D`, `--dired` generate output designed for Emacs' dired mode
- `-f` do not sort, enable `-aU`, disable `-ls --color`
- `-F`, `--classify` append indicator (one of `*/=>@|`) to entries
- `--file-type` likewise, except do not append `**`
- `--format=WORD` across `-x`, commas `-m`, horizontal `-x`, long `-l`,
- single-column `-1`, verbose `-l`, vertical `-C`
- `--full-time` like `-l --time-style=full-iso`
- `-g` like `-l`, but do not list owner
- `--group-directories-first`
- group directories before files;
- can be augmented with a `--sort` option, but any
- use of `--sort=none` (`-U`) disables grouping
- `-G`, `--no-group` in a long listing, don't print group names
- `-h`, `--human-readable` with `-l` and/or `-s`, print human readable sizes
- (e.g., 1K 234M 2G)
- `--si` likewise, but use powers of 1000 not 1024
- `-H`, `--dereference-command-line`
- follows symbolic links listed on the command line
- `--dereference-command-line-symlink-to-dir`
- follow each command line symbolic link
- that points to a directory
- `--hide=PATTERN` do not list implied entries matching shell `PATTERN`
- (overridden by `-a` or `-A`)
- `--indicator-style=WORD` append indicator with style `WORD` to entry names:
- none (default), slash (`-p`),
- file-type (`--file-type`), classify (`-F`)
- `-i`, `--inode` print the index number of each file
- `-I`, `--ignore=PATTERN` do not list implied entries matching shell `PATTERN`
- `-k`, `--kibibytes` default to 1024-byte blocks for disk usage
- `-l` use a long listing format
- `-L`, `--dereference` when showing file information for a symbolic
- link, show information for the file the link
- references rather than for the link itself
- `-m` fill width with a comma separated list of entries
- `-n`, `--numeric-uid-gid` like `-l`, but list numeric user and group IDs
- `-N`, `--literal` print raw entry names (don't treat e.g. control
- characters specially)
- `-o` like `-l`, but do not list group information
- `-p`, `--indicator-style=slash`
- append / indicator to directories

- *-q, --hide-control-chars print ? instead of nongraphic characters*
- *--show-control-chars shownongraphic characters as-is (the default, unless program is 'ls' and output is a terminal)*
- *-Q, --quote-name enclose entry names in double quotes*
- *--quoting-style=WORD use quoting style WORD for entry names:*
 - *literal, locale, shell, shell-always, c, escape*
- *-r, --reverse reverse order while sorting*
- *-R, --recursive list subdirectories recursively*
- *-s, --size print the allocated size of each file, in blocks*
- *-S sort by file size, largest first*
- *--sort=WORD sort by WORD instead of name: none (-U), size (-S), time (-t), version (-v), extension (-X)*
- *--time=WORD with -l, showtime as WORD instead of default*
- *modification time: atime or access or use (-u);*
- *ctime or status (-c); also use specified time*
- *as sort key if --sort=time (newest first)*
- *--time-style=STYLE with -l, showtimes using style STYLE:*
 - *full-iso, long-iso, iso, locale, or +FORMAT;*
 - *FORMAT is interpreted like in 'date'; if FORMAT*
 - *is FORMAT1FORMAT2, then FORMAT1 applies*
 - *to non-recent files and FORMAT2 to recent files;*
 - *if STYLE is prefixed with 'posix-', STYLE*
 - *takes effect only outside the POSIX locale*
- *-t sort by modification time, newest first*
- *-T, --tabsize=COLS assume tab stops at each COLS instead of 8*
- *-u with -lt: sort by, and show, access time;*
- *with -l: showaccess time and sort by name;*
- *otherwise: sort by access time, newest first*
- *-U do not sort; list entries in directory order*
- *-v natural sort of (version) numbers within text*
- *-w, --width=COLS assume screen width instead of current value*
- *-x list entries by lines instead of by columns*
- *-X sort alphabetically by entry extension*
- *-Z, --context print any security context of each file*
- *-1 list one file per line. Avoid '\n' with -q or -b*
- *--help display this help and exit*
- *--version output version information and exit*
- *Using color to distinguish file types is disabled both by default and with --color=never. With --color=auto, ls emits color codes only when standard output is connected to a terminal. The LSCOLORS environment variable can change the settings. Use the dircolors command to set it.*
- *Exit status:*
 - *0 if OK,*
 - *1 if minor problems (e.g., cannot access subdirectory),*
 - *2 if serious trouble (e.g., cannot access command-line argument).*
- *invalid argument %s for %s*
- *ambiguous argument %s for %s*
- *Valid arguments are:*
 - *%s*
- *write error*
- *%s: %s*
