

Malware Analysis Report For

0d7960a39b92dad88986deea6e5861bd00fb301e92d550c232aebb36ed010e46

Binary Type

ELF (Executable and Linkable Format). (Approved)

Analyzing File

- File Name:** 0d7960a39b92dad88986deea6e5861bd00fb301e92d550c232aebb36ed010e46
- File Extension:**
- File Type:** ELF (Executable and Linkable Format).
- MD5 Hash:** ccdaa9047367569e12f40269af4865fa
- SHA256 Hash:** 0d7960a39b92dad88986deea6e5861bd00fb301e92d550c232aebb36ed010e46

File Identification

File detected as a valid Linux executable.

ELF File Analysis

ELF File Analysis: True

ELF File Imports

- libpthread.so.0
- librt.so.1
- libdl.so.2
- libm.so.6
- libc.so.6
- ld-linux-x86-64.so.2

ELF File Exports

No Exported functions were found.

- Usage: xmrig [OPTIONS]
- Network:
- -o, --url=URL URL of mining server
- -a, --algo=ALGO mining algorithm <https://xmrig.com/docs/algorithms>
- --coin=COIN specify coin instead of algorithm
- -u, --user=USERNAME username for mining server
- -p, --pass=PASSWORD password for mining server
- -O, --userpass=U:P username:password pair for mining server
- -x, --proxy=HOST:PORT connect through a SOCKS5 proxy
- -k, --keepalive send keepalived packet for prevent timeout (needs pool support)
- --nicehash enable nicehash.com support
- --rig-id=ID rig identifier for pool-side statistics (needs pool support)
- --daemon use daemon RPC instead of pool for solo mining
- --daemon-poll-interval=N daemon poll interval in milliseconds (default: 1000)
- --self-select=URL self-select block templates from URL
- -r, --retries=N number of times to retry before switch to backup server (default: 5)
- -R, --retry-pause=N time to pause between retries (default: 5)
- --user-agent set custom user-agent string for pool
- --donate-level=N donate level, default 5%% (5 minutes in 100 minutes)
- --donate-over-proxy=N control donate over xmrig-proxy feature
- --no-cpu disable CPU mining backend
- -t, --threads=N number of CPU threads
- -v, --av=N algorithm variation, 0 auto select
- --cpu-affinity set process affinity to CPU core(s), mask 0x3 for cores 0 and 1
- --cpu-priority set process priority (0 idle, 2 normal to 5 highest)
- --cpu-max-threads-hint=N maximum CPU threads count (in percentage) hint for autoconfig
- --cpu-memory-pool=N number of 2 MB pages for persistent memory pool, -1 (auto), 0 (disab
- --cpu-no-yield prefer maximum hashrate rather than system response/stability
- --no-huge-pages disable huge pages support
- --asm=ASM ASM optimizations, possible values: auto, none, intel, ryzen, bulldo
- --randomx-init=N threads count to initialize RandomX dataset

- --randomx-no-numa disable NUMA support for RandomX
- --randomx-mode=MODE RandomX mode: auto, fast, light
- --randomx-1gb-pages use 1GB hugepages for dataset (Linux only)
- --randomx-wrmsr=N write custom value (0-15) to Intel MSR register 0x1a4 or disable MSR
- --randomx-no-rdmsr disable reverting initial MSR values on exit
- --astrobwt-max-size=N skip hashes with large stage 2 size, default: 550, min: 400, max: 12
- --astrobwt-avx2 enable AVX2 optimizations for AstroBWT algorithm
- --api-worker-id=ID custom worker-id for API
- --api-id=ID custom instance ID for API
- --http-host=HOST bind host for HTTP API (default: 127.0.0.1)
- --http-port=N bind port for HTTP API
- --http-access-token=T access token for HTTP API
- --http-no-restricted enable full remote access to HTTP API (only if access token set)
- --openccl enable OpenCL mining backend
- --openccl-devices=N comma separated list of OpenCL devices to use
- --openccl-platform=N OpenCL platform index or name
- --openccl-loader=PATH path to OpenCL-ICD-Loader (OpenCL.dll or libOpenCL.so)
- --openccl-no-cache disable OpenCL cache
- --print-platforms print available OpenCL platforms and exit
- --cuda enable CUDA mining backend
- --cuda-loader=PATH path to CUDA plugin (xmrig-cuda.dll or libxmrig-cuda.so)
- --cuda-devices=N comma separated list of CUDA devices to use
- --cuda-bfactor-hint=N bfactor hint for autoconfig (0-12)
- --cuda-bsleep-hint=N bsleep hint for autoconfig
- --no-nvml disable NVML (NVIDIA Management Library) support
- -S, --syslog use system log for output messages
- -l, --log-file=FILE log all output to a file
- --print-time=N print hashrate report every N seconds
- --health-print-time=N print health report every N seconds
- --no-color disable colored output
- --verbose verbose output
- -c, --config=FILE load a JSON-format configuration file
- -B, --background run the miner in the background
- -V, --version output version information and exit
- -h, --help display this help and exit
- --dry-run test configuration and exit
